5-Day Course

GLOBAL FISCAL SYSTEMS FOR OIL & GAS AND ANALYSIS OF EXPLORATION AND PRODUCTION CONTRACT TYPES

This Course provides participants an in-depth understanding of petroleum fiscal systems, including royalties production sharing contracts, concessions, joint ventures and service agreements, both in Equatorial Guinea and in other countries.

WHO SHOULD ATTEND THIS COURSE

This Course is designed for a wide range of professionals involved in the oil and gas industry, including: government officials, national and external affairs managers, general managers, CEOs and CFOs, tax advisors and tax planning professionals, legal counsel, licensing administrators, negotiators, executive strategy and planning managers, portfolio managers, commercial advisors, accountants, business and corporate development professionals, new venture managers, engineers and geophysicists, lawyers, economics and business analysts.

COURSE OBJECTIVES

- Gain fiscal and legal knowledge to negotiate better contracts and concessions.
- Understanding of the underlying economic characteristics of various fiscal systems.
- Gain an understanding of how government policies influence fiscal systems.
- Knowledge of the wide range of fiscal systems based on concessions, production sharing contracts, joint ventures, service contracts, and other arrangements across the value chain.
- How to conduct advanced economic analysis using Excel spreadsheets.

TRAINING METHODOLOGY

This intensive 5-day course introduces participants to petroleum and gas fiscal systems, highlighting their central role in profitability analysis of oil deposits. The sessions will be highly interactive, and participants will work with Excel spreadsheets, gaining hands-on, up-to-date experience through real-world examples.
